Hash done for default files created in flash drive on HashMyFiles and Hasher

Flash drive is not all 0s, but that is said to be okay for this this case as the flash drives are not perfect

FTK Imager picture of the same flash drive, done to double check

Checksum from HxD

Added FTK Imager, BelkasoftRamCapturer and MRC to the 0'ed flash drive

I realized I downloaded the setup file so I copied it to the flash drive (FTK Imager)
